

TRUTH TALKER

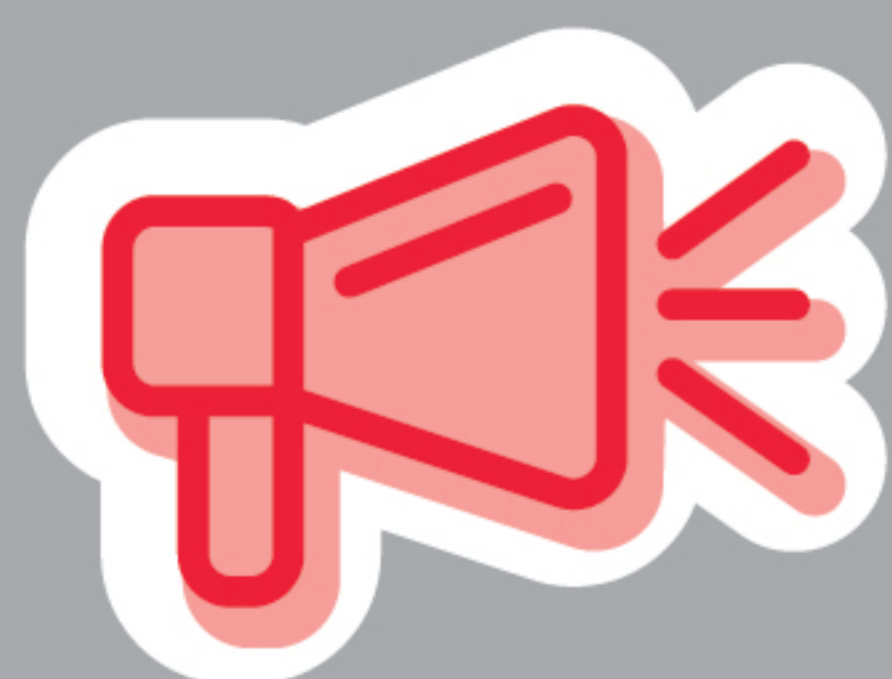

“Has the facts about climate change and tells others about it”

WHAT THEY DO:

Reports online bullies

Speaks up against any type of discrimination in their community

Fights misinformation with true facts and scientific evidence

Why do we need the Truth Talker?

The coronavirus has shown how important it is to listen to scientists. People all over the world are searching for information on how to keep safe, stay hopeful and help one another. The same goes for climate change. Scientists have been telling us that climate change is happening due to human activities and that we are on a path that will increasingly hurt the lives, livelihoods and health of people. And scientists also have the solutions to building a more sustainable world. Find out the facts and share them with your friends. Help counter misinformation. And speak up against discrimination and bullying. There's no place for that. We are one human family and need to act together, in solidarity, for a better future for all.

FACT OR FICTION

CLIMATE ACTION EDITION

In order to tell others the truth about climate change you first need to learn what the truth is. **Circle true or false for each common statements below and check your answers at the bottom!**

- | | |
|---|---------------------|
| 1. GLOBAL WARMING ISN'T REAL BECAUSE IT STILL GETS COLD OUTSIDE | TRUE / FALSE |
| 2. PLANTS NEED CARBON DIOXIDE | TRUE / FALSE |
| 3. CLIMATE CHANGE IS ONLY A PROBLEM FOR THE FUTURE | TRUE / FALSE |
| 4. ALL ANIMALS WILL ADAPT TO CLIMATE CHANGE | TRUE / FALSE |
| 5. THERE IS NOTHING I CAN DO THAT WILL MAKE A DIFFERENCE WHEN IT COMES TO CLIMATE CHANGE | TRUE / FALSE |

1. FALSE - Although it still gets cold outside, scientists agree that the average temperature on Earth has been getting warmer over the past 100 years, due to human activities. Global warming refers to the increase in the Earth's average temperatures over a long period of time, as opposed to the weather, which changes daily.
2. TRUE - However, plants can only absorb so much of this and there is more CO₂ in the atmosphere than ever before.
3. FALSE - We are already seeing the devastating effects of climate change and need to act now!
4. FALSE - We are seeing many animals changing their migratory and feeding patterns, but there are more than a million species at risk of extinction due to human activities, including climate change.
5. FALSE - We can still do something about climate change, and everyone needs to do their part. Every action matters, and when we act together, we can make a big difference.

HERO TIP:

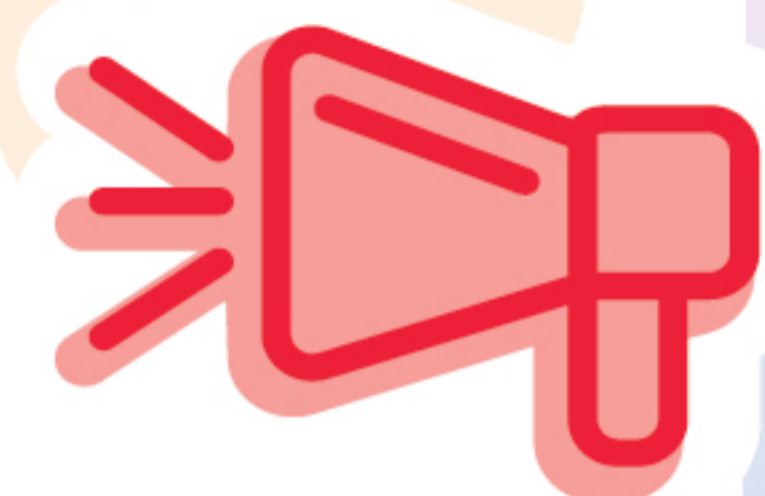

It's easy to believe what you hear but remember to do your research and speak up for the truth!
