Doc Type: National Proposal
Title: **Proposal on Tibetan BrdaRten Characters Encoding for ISO/IEC 10646 in BMP**
Source: **China**
Status: **To be discussed in WG2**

Explanation on Tibetan BrdaRten Characters Encoding for ISO/IEC 10646 in BMP

1. Introduction

The written form of Tibetan language could be regarded as a horizontal stream of basic Tibetan characters and BrdaRten characters without vertical combining. The BrdaRten characters are vertically pre-composed Tibetan characters. The repertoire of BrdaRten characters proposed in this document are those stably structured, widely and frequently used BrdaRten with high usage coverage to modern Tibetan, including modern Tibetan characters, frequently used Sanskrit characters, "borrowed character" used to represent modern terms by pronunciations. This document proposes 956 BrdaRten characters.

192 Tibetan characters encoded in ISO/IEC 10646, are Tibetan letters, Sanskrit letters, punctuations, astronomy and special symbols. They enable to represent thousands Tibetan characters using dynamic combing methods with minimum code points. However, because of technical reasons, this encoding scheme is not compatible with traditional education, publication and electronic desktop publishing systems. It seems still quite difficult to properly solve the problems with Tibetan information interchange and processing.

1) The biggest difficulty for Tibetan information processing is the vertical composition of Tibetan characters. After the composition, each component would be changed greatly in shape and size, especially the vertical composition of the Sanskrit would reach to 7 layers where each letter requires different spans in height and width at the same layer that is quite hard to be dealt with. Up to now, there is no report showing any system platform has implemented Tibetan processing system using dynamic combining method.

2) In the implementation level 1 of ISO/IEC 10646, one code corresponds one character but one Tibetan BrdaRten character needs several codes to represent with very length which is a big block to the implementation of Tibetan system. In practical applications, the bilingual processing such as Tibetan-Chinese or Tibetan-English at the same level of implementation is an underlying requirement of Tibetan users.

Since 1990s, from DOS to Windows, both domestic and overseas applications have been using Tibetan BrdaRten character set at implementation level 1. For example, the Founder desktop publishing system for Tibetan is based on BrdaRten characters which has become the de-facto industry standard for Tibetan information interchange and processing in China and even outside of China.

Tibetan BrdaRten characters are structure-stable characters widely used in education, publication, classics documentation including Tibetan medicine. The electronic data containing BrdaRten characters are estimated beyond billions. Once the Tibetan BrdaRten characters are encoded in BMP, many current systems supporting ISO/IEC10646 will enable Tibetan processing without major modification. Therefore, the international standard Tibetan BrdaRten characters will speed up the standardization and digitalization of Tibetan information, keep the consistency of implementation level of Tibetan and other scripts, develop the Tibetan culture and make the Tibetan culture resources shared by the world.

2. Background of the proposal

Since 1993, every effort has been made by Tibetan experts in deep study on researchers' study on the history, current usage, classics, modern publications, structure characteristics of Tibetan script. With the above outcome, referred to statistics of usage frequency of Tibetan characters,

the BrdaRten encoding principle is formed for this proposal.

3. Principle

1) The BrdaRten character set is the extension of the encoded basic Tibetan character set, including the modern Tibetan characters, frequently used Sanskrit and the "borrowed characters" which are derived from the 3 times normalization in Tibetan history.
2) The BrdaRten character set plus the basic Tibetan characters shall be able to represent and interchange all of the information based on the modern Tibetan language in order to meet the requirement of modern Tibetan life.
3) The ordering of the BrdaRten characters should reasonable.
4) The BrdaRten characters must be feasible to implement.

4. Technical facts

1) The BrdaRten characters coverage to the modern Tibetan documents is approaching 100%.
2) The ordering of Tibetan BrdaRten characters is based on the "base characters" with consideration of Tibetan writing rule, structure features and grammar discipline.
3) Each BrdaRten character is represented by one code instead of several codes. This makes Tibetan script same as many other scripts in implementation level and facilitates the Tibetan information processing.

5. Conclusion

After serious discussion and analysis by Tibetan linguists, encoding experts and software developers in China, all are in favor to establish a national and international standard Tibetan BrdaRten character set to meet the requirement of Tibetan information processing. BrdaRten character encoding in BMP would be a significant step towards unified and normative manner of Tibetan information processing in the world.

PROPOSAL SUMMARY FORM TO ACCOMPANY SUBMISSIONS

FOR ADDITIONS TO THE REPERTOIRE OF ISO/IEC 10646

A. Administrative

1. **Title :**	**Tibetan BrdaRten Character**
2. Requester's name :	China
3. Requester Type (Member body/Liaison/individual contribution):	Member body
4. Submission date :	2002-12-07
5. Requester's reference (if applicable) :	
6. (Choose one of the following:):	
This is a complete proposal:	
or, More information will be provided later:	Yes

B. Technical - General

1. (Choose one of the following:):

    a. This proposal is for a new script (set of characters) :   Yes

        Proposed name of script :   Tibetan BrdaRten Character

    b. The proposal is for addition of character(s) to an existing block: No

        Name of the existing block:

2. Number of characters in proposal :   956

3. Proposed category (see section Ⅱ ,Character Categories):   A

4. Proposed Level of implementation (1, 2 or 3)(see clause 14, ISO/IEC 10646/IEC 10646-1: 2000):   1

5. Is a repertoire including character names provided?   Yes

    a.   If yes, are the names in accordance with the 'character naming guideline

        in Annex L of ISO/IEC 10646-1:2000?   Yes (will provide)

    b. Are the character shapes attached in a legible form suitable for review?   Yes

6. Who will provide the appropriate computerized font(ordered preference: True Type, or PostScript format) for

    publishing the standard?   Tibetan Language Research and Developing Committee, Tibet University

    If available now, identify source(s) for the font (including address, e-mail, ftp-site, etc) and indicate the tools

    used: Tibetan Autonomous Region Guiding Committee Office of Tibetan, Tibet University   (ftp://210.41.7.3)

7. References:

    a.   Are references (to other character sets, dictionaries, descriptive texts etc.) provided?   Yes(will provide)

    b.   Are published examples of use(such as samples from newspapers, magazines, or other sources)

        of use of proposed characters attached?   Yes(will provide)

8. Special encoding issues:

    Does the proposal address other aspects of character data processing (if applicable) such as input,

    presentation, sorting, indexing, transliteration etc. (if yes please enclose information)

    No

9. Additional Information:

Submitters are invited to provide any additional information about Properties of the proposal Character(s) or Script

that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script.

Examples of such properties are: Casting information, Numeric information, Currency information, Display behaviour

information such as line breaks, widths etc. Combining behaviour , Default Collection behaviour, relevance in Mark Up contexts, Compatibility equivalence and other Unicode normalization related information.

See the Unicode standard at http://www.unicode.org   for such information on other scripts. Also see http://www.unicode.org/Public/UNIDATA/UnicodeCharacterDatabase.html and associated Unicode Technical Reports for information needed for consideration by the Unicode Committee for inclusion in the Unicode Standard.

c. Technical-Justification

1. Has this proposal for addition of character(s) been submitted before?   No
   If YES explain _____

2. Has contact been made to members of the user community (for example: National Body,
   user groups of the script or characters, other experts, etc.)?   Yes
   If YES, with whom?   Nationnal Body
   If YES, available relevant documents: Info will be provide

3. Information on the user community for the proposed characters (for example:
   size, demographics, information technology use ,or publishing use)is included?   Yes
   Reference   Yes (will provide)

4. The context of use for the proposed characters (type of use; common or rare)   common
   Reference: Info will be provide

5. Are the proposed characters in current use by the user community?   Yes
   If YES, where? Reference: Worldwide

6. After giving due considerations to the principles in *Principles and Procedures document* (a WG 2 standing
   document)must the proposed characters be entirely in the BMP?   Yes
   If YES, is a rationale provided?
   If YES, reference:

7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)? Yes

8. Can any of the proposed characters be considered a presentation form of an
   existing character or character sequence?   Yes
   If YES, is a rationale for its inclusion provided?
   If YES, reference:

9. Can any of the proposed characters be encoded using a composed character sequence of either
   existing characters or other proposed characters?   Yes
   If YES,is a rationale for its inclusion provided?
   If YES,reference:

10. Can any of the proposed character(s) be considered to be similar (in appearance
    or function) to an existing character?   No
    If YES,is a rationale for its inclusion provided?
    If YES,reference:

11.Does the proposal include use of combining characters and/or use of composite sequences
    (see clauses 4.12 and 4.14 in ISI/IEC 10646-1:2000)?   No
    If YES, is a rationale for such use provided?
    If YES, reference:
    Is a list of composite sequences and their corresponding glyph images (graphic symbols)
    provided?   _____
    If YES,reference:_____

12.Does the proposal contain characters with any special properties such as
    control function or similar semantics?   NO
    If YES,describe in detail (include attachment if necessary)

13.Does the proposal contain any Ideographic compatibility character(s)?   No
    If YES,is the equivalent corresponding unified ideographic character(s) identified?
    If YES,reference:_____
