

List of packaging and nonpackaging

At what point do we speak about packaging?

Generally, it is easy to determine whether an element surrounding a product is considered as packaging or not:

- A drinking can
- A bottle
- A jam jar, etc.

For other elements, the distinction however is more difficult:

- A Coffee-capsule
- A lipstick
- A matchbox

Based on the legal definition of packaging, Valorlux has established a non-exhaustive list of examples. If you are not sure whether one of your products is packaging or not, please feel free to use this list as a guide.

| Products | Packaging | Non- packaging |
|---|-----------|-------------------|
| Food | | |
| Filled board * single-use, also fries bags *, trays*, cups *, etc. * | X | |
| Empty board *, empty cup* | | X |
| Lollipop stick in and popsicles | | X |
| Disposable weaning bottles sold empty | | X |
| Disposable weaning bottles that are sold filled | X | |
